

# con·ser·va·to·ry

**Valley Christian Schools'** visual and performing arts program continues to experience tremendous growth, success, and excitement! The program's strength is evident—especially with the launch of the VCHS Conservatory of Music two years ago. Starting with just 22 students, the Conservatory enrolled 100 students in just its third year, and expects continued future growth.

In 2008, the VCS applied for permits to build a new 42,000 square foot fine arts building, complete with expanded performance venues, rehearsal halls, practice rooms, teaching studios, music technology lab, recording studio, and black box theatre. The fine arts building will serve as a campus showcase, acting as an impetus for expanding the Conservatory to include theatre, art, and dance.

And it doesn't stop there. Valley Christian's fine arts focus came full circle with the 2008 creation of the Junior Conservatory for junior high music students, and "Kidservatory," an after school arts program for elementary students.

The Valley Christian Conservatory is rooted in a strong elementary music program, starting in kindergarten. By 4th and 5th grade, every student is enrolled in band, orchestra, or piano lab. As these young students continue their training through junior high and into high school, Valley Christian expects Conservatory enrollment to increase dramatically.

**Our Mission:** *To discover and develop the extraordinary God-given talent of young artists to reclaim the arts as an expression of God's love among the varied cultures of the world.*
